

Protocol for first Bio-Brain meeting 15th September 2016.

Participants:

Håkan, Elias, Eva, Emelie, Domenico, Ben, Christofer & Carina.

People who are interested but not present today:

Hanna, Conny, Margarita, Stephan, Hanna Berggren, Jimmy.

What we talked about:

1. The meetings could be a combination of Journal Club and problem solving.

2. Suggestion for speaker:

Marcus Lindh (post doc)

3. To have a secretary at every meeting that also takes note of attendance (good for credits). This task should rotate, and protocol should be posted to the coming git-hub or moodle page.

Domenico will set up the git-hub, and the rest of us get the task to set up accounts there until next week.

4. We could get credits for the meeting, talk to Jonas about it.

5. **Next meeting will be on the 20th of september, at 13:00**, and will be a talk by Daniel Lundin. (Ben will double check this with Daniel)

6. In the future we'll try to have the meetings on **wednesdays after lunch, at 13:00**.

The meetings can be around 1.5 hours, including both a journal club and problem solving.

7. The **third meeting will be on the 28th of September at 13:00**, and on that meeting we will do like a personal presentation of our working experiences with bioinfo-stuff. What we are working on today, and what we would like to learn more about, have problems with etc.

At the end of this meeting we will have a brainstorm about the following meetings, what they will be about and what we want to learn.

8. Christofer will set up a maillist and include all who were at the meeting and the ones who are interested in participating.

9. Info about an upcoming meeting in Linköping on the 20-21 october in Linköping, The Swedish Bioinformatics Workshop. It's a workshop for students and postdocs in Sweden who are working with bioinformatics.

10. Good books:

Bioinformatic Data Skills

Practical Computating for biologists

The R-book

R in action
